**PACIFIC**  
**IRIS GARDENS**

205 West Walnut Avenue  
Arcadia, Calif.

## **FREE Iris**

In order to build up a list of new customers and to demonstrate the fine quality of iris rhizomes grown by us we are offering FREE to each new customer iris having a value of at least \$1.00. This will be in addition to the EXTRAS we usually include. The amount and kind of EXTRAS depend upon the size and type of each order.

## **Terms**

Check, Draft or Money Order should accompany each order.

Charges prepaid on orders over \$2.50. For orders less than this amount add 25c for shipping charges.

California residents add 2 ½ % Sales Tax.

Discount of 10% given on orders of \$10.00 or over (except on Collections and Chivalry).

All varieties guaranteed true to name.

No substitutes unless requested, in which event give second choice.

All iris lovers should keep up with the latest developments in iris varieties and culture by joining the AMERICAN IRIS SOCIETY. The illustrated quarterly bulletins carry a wealth of information of interest to the amateur as well as specialist. Send check for membership to

H. R. WATKINS, Sec. A.I.S.

SEPTEMBER SKIES (B), apricot rose.....	.25
SOU. de L. MICHAUD (B), lobelia blue.....	.25
ULTRA (B), ultramarine and violet.....	.35

In addition to the above, the following iris bloomed in our gardens during the Fall. These may be found in the General Lists:

AUREX	FLORA ZENOR	MISSOURI NITE
CHINA MAID	GLOWPORT	THE BISHOP
FAIR ENOUGH	LOUVOIS	ZWANNENBURG
GEORGIA	SUNGOLD	CHINA LANTERN
LADY MOHR	ZAHARON	ELDORADO
RADIANT	BRONZINO	GAY HUSSAR
WAR EAGLE	DON JUAN	G. P. BAKER
BLACK HAWK	FORT KNOX	OREGON SUNSHINE
CRYSORO	GOLD TOP	TIFFANY

## IRIS COLLECTIONS

**COLLECTION A** — Any 2 for \$11.00. All 3 for \$15.90.

LADY MOHR	WHITE WEDGEWOOD	FRANCELIA
-----------	-----------------	-----------

**COLLECTION B**—LADY MOHR plus 3 of following for \$11.90.  
All 6 for \$19.80

TISHOMINGO	MASTER CHARLES	OLA KALA
SNOW CARNIVAL	BLUE SHIMMER	BROWN THRASHER

**COLLECTION C**—3 of following for \$5.75. 5 for \$9.95.

REMEMBRANCE	DAYBREAK	AZURE SKIES
MOONLIGHT MADONNA	FRANCONIA	MULBERRY ROSE

**COLLECTION D**—3 from Group 1 plus 1 from Group 2 for \$6.50. All 6 for \$9.75.

Group 1		Group 2
MULBERRY ROSE	SPUNGOLD	STORMKING
COPPER ROSE	BERKELEY GOLD	RED VALOR

**COLLECTION E**—2 from Group 3 plus 5 from Group 4, \$7.85.

Group 3		Group 4
GOLDEN FLEECE	CAROLINE BURR	WAKARUSA
L. MERTON GAGE	CALIFORNIA PEACH	ELMOHR
VIOLET SYMPHONY	GOLDEN EAGLE	SNOW FLURRY

**COLLECTION F**—All 3 for \$2.75.

CAROLINE BURR	SNOW FLURRY	GREAT LAKES
---------------	-------------	-------------

**COLLECTION G**—9 from following for \$5.65. All 12 for \$7.75.

GREAT LAKES	GALLANT LEADER	WAVERLY
FORT KNOX	THE RED DOUGLAS	MELITZA
MATTERHORN	OLD PARCHMENT	FLORA ZENOR
MONADNOCK	WM. ASBURY	BLUE SPIRE

**COLLECTION H**—5 from Group 5 plus 4 from Group 6 for \$5.95. All 15 for \$9.95.

Group 5		
BERMUDA SAND	SABLE	CHINA BOY
REGAL BEAUTY	STARDOM	LATE SUN
	STELLA POLARIS	

Group 6		
FIESTA	RED GLEAM	FLORENTINE
LANCASTER	THE ADMIRAL	RED GLEAM
	RUTH POLLOCK	YELLOW JEWEL

**COLLECTION J**—Any 8 of following for \$3.95. All 12 for \$5.95.

GREAT LAKES	WHITE GODDESS	PERSUASION
MING YELLOW	ORANGE BRONZE	MT. WASHINGTON
SUNGOLD	PRINCE OF ORANGE	CHINA MAID
SNOQUALMIE	MOROCCO ROSE	AUBANEL

**COLLECTION K**—Any 10 for \$3.35. 15 for \$4.95.

GOLDEN MAJESTY	SIEGFRIED	BRONZINO

CRYSTAL BEAUTY	JEAN SIRET	ALAMEDA
AUTUMN HAZE	BLUE JUNE	LORELEY
CITRONELLA	BOADECIA	GLEAM
CANTABILLE	DARIUS	LONA

## **IRIS CULTURE**

The Iris is one of the most beautiful yet easiest flowers to grow. By careful selection of different iris one can have a succession of bloom extending over a six months' period. The wide variety of colors and various heights offer many intriguing possibilities in garden arrangements.

### **SOIL CONDITIONS**

The Iris thrives in almost any class of well drained soil; however, a slightly alkaline soil is preferable to one on the acid side.

### **FERTILIZING**

Bone meal is recommended by many as being the best fertilizer. In sandy, porous soils, especially in Southern California and the warmer climates, phenomenal growth and bloom may be accomplished by digging in well rotted manure a week or two before planting. In most soils, however, iris will thrive with little or no fertilizer.

### **WATER**

When rhizomes are first set out they should be well watered until established, but watering during the heat of the day should be avoided. On established plants excessive summer watering causes the plant to go to roots and foliage at the expense of blooms.

### **SPACING AND DEPTH PLANTING**

In warm climates it is best to cover the rhizomes with at least  $\frac{1}{2}$  inch of soil. If planted much deeper, however, poorer bloom will result. In setting out new iris rhizomes may be set in rows as little as 12 inches apart, providing the iris all point in the same direction. The rows, however, should be from 30 to 36 inches apart.

Another good arrangement for garden effect is to plant three rhizomes of the same kind in a clump, with each clump allowing about 24 inches between clumps.

Iris may be planted at almost any time during the year. Do not cut back foliage except in transplanting.

IRIS INTRODUCTIONS  
OF  
A. H. HELLER

Pacific Iris Gardens  
205 W. Walnut Ave.  
Arcadia, California

## 1948 IRIS INTRODUCTIONS FROM GARDENS OF A. H. HELLER

Mr. Heller has been hybridizing iris for 15 years, with average annual plantings of from 5000 to 10,000 seedlings from carefully selected crosses. As a result he has obtained many new beautiful varieties and improvements that have won the acclaim of judges and all iris lovers who have seen them. So far, however, Mr. Heller has registered very few iris and introduced only one, namely, GREEN PASTURES (Whiting Introduction 1947). Because of repeated requests that Mr. Heller introduce more of his wonderful seedlings we are pleased to offer this year a number of those which he and various judges felt had been sufficiently tested under various conditions to warrant their introduction. Some of these iris were first developed a number of years ago and a large stock has accumulated so that it is possible in such cases to set a low introductory price.

**GRECIAN ROBE** (Heller 1948) No. 1-5-23 (Sungold x Chosen) x E. B. Williamson) Midseason. 48 inches. In 1945 Mr. Heller received H. C.'s on three wonderful very tall bearded iris, namely GRECIAN ROBE, GREEN PASTURES and GOLD BROCADE. Since then all three have been fully tried and tested in various parts of the United States under different climatic conditions and these have repeatedly won Blue Ribbons when displayed at various iris shows. Of the three GRECIAN ROBE has the most perfect flower and widest falls. It is aptly named since it is a creamy white with decided gold border on the edges of both falls and standards. In this new introduction besides its own intrinsic self beauty one could not ask for any better breeding stock for substance height and perfect branching. Mr. Heller has obtained a number of wonderful crosses from this iris. 9 to 12 buds.....\$15.00

**GOLD BROCADE** (Heller 1948) (Golden Majesty x Radiant) Midseason to Late. 48 inches. Since Mr. Heller first developed this iris many deep golds have been introduced but we have not seen any which combine all the fine points of GOLD BROCADE. It has exceptional height, well shaped flowers, ideal sturdy branching, a chamois like feel of heavy texture. The name was suggested by the presence of gold brocading on the haft and blade on a deeper gold background, yet the entire flower is a deep gold self with an entire absence of unsightly reticulations or veining so common to many tall golds of this class. The few crosses which Mr. Heller has found time to make with this iris have yielded off-spring which no doubt will be heard from in the future. He suggests further work by breeding this iris with OLA KALA, PRINCE OF ORANGE, THE RED DOUGLAS as well as with his own GREEN PASTURES and BROWN SUEDE. The plant is a long bloomer with 11 to 13 buds.....\$15.00

**BROWN SUEDE** (Heller 1948) No. 135-5-2. (Junaluska x Sonny Boy) Midseason 36 in. This was the best of a number of beautiful iris obtained from this cross. Some judges may remember it as having the sug-

gested name of The Franciscan because of its true brown color and suede like substance so suggestive of a Franciscan's Robe. Since then this name was registered to another iris, hence the new name. This is a strikingly different brown iris in two shades. The falls are velvety dark brown with well domed standards of a lighter more satiny brown. There are no reticulations present. The stalks are well branched and carry an average of 10 buds. The orange beard is tipped with brown and the plant has stiff broad foliage. Crosses are suggested with such iris as TOBACCO ROAD, CASA MORENA and BRYCE CANYON, as well as with GOLD BROCADE and PAINTED DESERT to develop additional height.....\$15.00

**RED MESA** (Heller 1948) (Rose Ultra x The Red Douglas) Midseason to Late. 36 in. A couple of years ago Mrs. Pattison told Mr. Heller that he had three wonderful different reds in his RED SCARF, RED MESA and ROSY FUTURE which she felt were worthy of introduction. Since then we have not seen anything in their color class or characteristics to compare with these iris. RED MESA is as different and unlike most reds as BROWN SUEDE is compared to most browns. The falls are a deep bright satiny mahogany red without the common purplish cast, while the lighter standards are a brownish red of silky sheen. The gold beard is tipped with brown and as is the case with BROWN SUEDE there is an entire absence of unsightly reticulations. The well branched stalks carry as many as 15 buds, while the perfectly shaped flowers are little affected by wind, rain or sun.....\$12.00

**RED SCARF** (Heller 1948) No. 21-20-3 (Tiffany x Miss Aravilla) Midseason 36 inches. This very brilliant red has been one of the brightest spots in Mr. Heller's garden for the past few years and every visitor searching for a bright red has usually been disappointed that this iris was not introduced and not for sale up to this time. We know of no better red for mass planting, and for this it has wonderful increase in that single rhizomes often give off as many as 5 blooming stalks per season. Standards and falls are of the same deep brilliant red color; however, the former are silky in texture while the falls are velvety. A large stock allows us to make an introductory price of.....\$8.00

**BISHOPS ROBE** (Heller 1948) No. 64-9-7 (The Bishop x Sable) Midseason 42 inches. It is a sight to behold this tall velvety black purple iris as a clump in a garden, especially when planted alongside such deep yellows as GOLD BROCADE. This iris obtains its depth of color from SABLE and its height, branching and flaring qualities from THE BISHOP. The blue and gold beard greatly add to the attractiveness of this iris. An average of 9 buds is had per stalk. For those in milder climates who wish an earlier as well as off-season bloomer of almost the same coloring and characteristics of THE BISHOPS ROBE we suggest its sister seedling, BISHOPS VELVET, listed under Early and Off-Season Bloomers.....\$7.50

**ROSY FUTURE** (Heller 1948) No. 11-7-1 (The Red Douglas x China Maid) Midseason to Late 40 inches. A beautiful large true deep rosy red with no suggestion of purple. The bloom has a satiny texture and there are no reticulations, but the haft is shaded a rosy brown .....\$6.00

**GOLDEN COACH** (Heller 1948) No. 1-1-1 (Golden Hind x Royal Coach) Midseason to Late 38 inches. A very deep flaring yellow with striking brown veins which takes the eye of the average flower lover. This iris has exceptional increase.....\$2.50

**KERMISS** (Heller 1948) (Tiffany x Miss Aravilla) x Ukiah) Midseason to Late 42 inches. A large tall plicata heavily bordered and stippled in red violet. It always has been a favorite with garden visitors being different from most plicatas and striking in its appearance. A good parent for hybridizing work on tall plicatas. 11-13 buds .....\$4.00

**CASCARONE** (Heller 1948) (Tiffany x Ukiah) Midseason 45 inches. This is another different and unusual tall plicata that likewise should prove of value to hybridizers. It can be listed as an oddity. The flowers are heavily ruffled and fluted. Standards are of a claret violet hue, while the falls have a yellow background on blade and haft bordered with black violet and heavily stippled and peppered in this shade. In all, it is an exceptionally dark plicata. The stems are well branched and the plant is a prolific bloomer with as many as 11 buds.....\$2.00

**PUMA** (Heller 1948) No. 0-2-14 (May Day x Sonny Boy) Midseason to Late 32 inches. Long blooming season. The reddish tawny color of this iris suggested its name, since the standards are a burnt orange, with deep orange brown falls and bright orange beard. The color combination is striking and has been a favorite with many who have seen it. It can really be classed as an addition to our brown group of iris .....\$4.00

**HAPPY MAID** (Heller 1948) (Happy Days x China Maid) Early to Midseason. 42 inches. A large light blue iris of heavy substance with almost horizontal falls. Additional points which make this iris outstanding are its brilliant prominent orange beard which is very striking against its light blue background, and its stately branching carrying three flowers at a time with 9 to 11 buds. (No. 25-2-19).....\$10.00

**CORONA DEL MAR** (Heller 1948) (Sierra Blue x Radiant) Midseason 48 inches. This was selected as being one of the best of Mr. Heller's good blues, because of its smoothness, perfection in bloom, ability to stand up in all kinds of weather. Each stalk often carries as many as 5 blooms at a time which makes it a perfect show iris, since there is little or no difference in texture and shade between the fresh and old flowers.....\$4.00

**PEARL ORIENTAL** (Heller 1948) (Grecian Robe x E. B. season to Late 40 inches. Often blooms off-season. Only two iris judges have seen this iris and they state it was one of the best seedlings in Mr. Heller's garden this year. A very unusual cream with a strong flesh tone suggesting a pink oriental pearl, all of which makes for great garden value. The flowers are large on well branched stems and as many as four blooms are open at a time. One of the most striking features is a vivid orange, almost red beard deep in the throat .....\$25.00

**GOLD WINGS** (Heller 1948) No. 135-3-3 (Golden Majesty x Naranja x Ming Yellow) Midseason 40 inches. A perfect smooth deep gold self without any

veining or reticulations. Stands up well in wind and rain. Very good branching.....\$10.00

### OFF SEASON AND EVERBLOOMING

The fact that there is always a demand by the general public for autumn blooming iris, most named varieties of which are di-ploids with few if any points that might class them as a good iris leads us to wish to introduce some of the tall bearded more or less everblooming iris which Mr. Heller has developed and such iris as these we believe will eventually supplant most of the so-called Autumn Bloomers now listed.

**CALIFORNIA PINK** (Heller 1948) No. 2-50-3-9 (Miss California x ?) 45 inches. Usually one of the first as well as one of the last to bloom with additional blooming periods running from August to January. This as well as BENGAL PRINCESS can in milder climates be depended on to yield blooms for a period of 6 to 8 months each year and still give large increase in rhizomes. In colder climates freezing may destroy the winter stalks but this only makes for more prolific blooms in the Spring or when warmer weather occurs.

This is a gorgeous large deep pink without the veining of its parent MISS CALIFORNIA. The flowers are full and well formed while branching is excellent. It has a deep bright blue beard.....\$12.50

**BENGAL PRINCESS** (Heller 1948) (Jean Siret x Sun-gold) 32 inches. Usual bloom about 8 months out of the year. A very unusual intermediate from an unusual cross of a small autumn bloomer with a tall off-season bloomer, which accounts for the everblooming qualities of this iris. The color is a chartreuse yellow with brown blush and stripes on the falls. The flowers are well shaped with a decided flare to the falls....\$2.50

**MUIR GLACIER** (Heller 1948) (34 inches) Very early to very late with additional blooms in Fall and Winter. A ruffled well shaped flaring blue white iris of heavy substance, with a deep blue cast in the throat even on old blooms. Excellent branching and very floriferous with exceptional increase.....\$3.50

**PACIFIC FOG** (Heller 1948) (Fair Enough x Purissima) Early to Midseason, 40 inches., as well as winter bloom. A blue white tall well branched iris. Possibly too tender for eastern gardens because of winter blooming habit .....\$2.00

**MAJESTIC GOLD** (Heller 1948) No. 1-1-60 (Golden Majesty x Radiant) 42 inches. Smooth large deep gold with beard of same color that blooms three or four times per year with 10 to 12 buds. Stalks of Fall and winter bloom are much shorter than those in the Spring. The standards are slightly lighter than the falls .....\$4.50

**GOLDEN CHOICE** (Heller 1948) No. 1-2-2 (Golden Hind x Fort Knox) 38 inches. Medium greenish golden yellow self with a haft of slightly deeper shade. A very smooth light gold that has won the admiration of garden visitors. No reticulations or veining. Well branched with large flowers.....\$4.50

**FONTANA** (Heller 1948) No. 26-5-23 (Yellow Seedling x Oregon Sunshine). Large light chartreuse yellow standards with cream falls and yellow haft. Beard of same color as falls.....\$2.00

**TOLTEC** (Heller 1948) No. 0-2-13 (Sungold x Christabel). An off-season large stately variegata with tan standards and heavily striped red falls. Height 40 to 48 inches .....\$2.00

**ALAMITOS** (Heller 1948) No. 51-11-1 (Yellow Seedling x Miss California). Everbloomer 36 inches. Broad Falls. Good substance. Standards as well as Falls deep cream with greenish gold haft and brownish gold reticulations, which become deeper in the throat. Well branched .....\$2.00

**BISHOPS VELVET** (Heller 1948) (The Bishop x Sable) 40 inches. This is an early and off-season bloomer similar in most respects to BISHOPS ROBE but not quite as good.....\$6.00

## 1947 INTRODUCTION

**GREEN PASTURES** (Heller 1947) No. 1407 (Old Ironsides x Oregon Sunshine) E. M. L. 54 inches. Introduced by Mrs. Whiting 1947. This is near to a green iris, a lovely chartreuse with a blue beard which enhances its beauty. The flowers are large and pleasingly ruffled, the stalk well branched, carrying 9 buds. The bloom extends over a long season from early to late, each flower lasting several days. The foliage stands 36 inches tall, clean and strong. The plant is prolific of bloom and increase and seems to be perfectly hardy. It is an iris that every connoisseur will want in his garden. Seven judges gave it an H. C. at the Hollywood Show in 1945.....\$20.00
